personal summary

I am a plant pathology epidemiologist and ecologist who can effectively communicate and collaborate with diverse partners and stakeholders in an international setting. My work encompasses traditional field-based research, epidemiological modeling, climate change, GIS and statistical methods. In turn, I use this work to understand what drives crop disease epidemics and derive disease control recommendations farmers and make recommendations for policy makers and other decision makers.

experience

since 2012	International Rice Research Institute (IRRI) <i>Develop tools and strategies for farmers to use in addressing rice diseases</i>	Scientist I
2011-2012	International Rice Research Institute (IRRI) <i>Linked plant disease models with GIS tools</i>	Post-Doctoral Fellow
2009-2010	Kansas State University <i>Developed and refined predictive Fusarium head blight models for wheat</i>	Post-Doctoral Research Associate
2002-2004	University of Nebraska-Lincoln <i>Managed maize and soybean plant pathology extension field research</i>	Research Technologist
2000-2003	University of Nebraska-Lincoln <i>Managed maize and sorghum plant pathology extension field research</i>	Research Technician
1999-2000	Purdue University <i>Coordinated training events for Purdue Diagnostic Training and Research Center</i>	Assistant Director
1997-1999	Purdue University <i>Managed soybean and canola production research studies</i>	Research Technician

education

2009	Ph.D. Plant Pathology Plant Disease Epidemiology and Ecology Dissertation: <i>Disease risk mapping with metamodels for coarse resolution predictors: global potato late blight risk now and under future climate conditions</i>	Kansas State University
2007	Graduate Certificate Geography Geographic Information Science	Kansas State University
2000	B.Sc. Agronomy Soil and Crop Management	Purdue University
